

**Position Title:** Scientist Cell Biology, Full Time      **Location:** San Diego, California

**Position Summary:** Development of cell-based assays such as cell microscopy, immuno-staining, antibody selection, understanding of biomarkers, and molecular diagnostics test analysis of DNA and RNA based disease detection for advanced analysis of patients with complex diseases.

**Responsibilities Include:**

- Develop cell-based assays such as immuno-staining, antibody selection and understanding of biomarkers.
- Immune-based techniques such as flow cytometry, cell sorting, immunohistochemistry, ELISAs, westerns, etc.
- Ability to apply a variety of cellular and molecular techniques to develop cellular models of disease for oncology.
- Experience preparing DNA and RNA libraries for Next generation sequencing.
- Ability to collaborate across multiple scientific disciplines.

**Required Qualifications:** Ph.D. plus 2 years of industry experience. Knowledge and hands-on experience in cell morphology, immune fluorescence analysis, cell-based assays. Experience in liquid biopsy is a plus. The work includes experimental design, trouble shooting and validation. The candidate must be interested to work in a fast pace, biotech start-up environment with diverse tasks and rapidly growing responsibilities.

**Compensation:** Dependent upon qualifications and experience, with an excellent benefits package.

**To Apply:** If you are interested in being part of building the next generation diagnostic technology that will impact the well-being of millions of people, please send your CV and a letter stating your interests to [jobs@biofluidica.com](mailto:jobs@biofluidica.com). Please put the job reference code SciCellBio 20240304 in the subject line of the email.

**Notice to Employment Agencies:** BioFluidica values our relationships with our recruitment partners. Please be advised that we will only accept resumes from those partners with whom we have a formal Recruitment Contract. BioFluidica is not responsible for any fees related to resumes that are unsolicited and received by any employee of BioFluidica.

**About:** BioFluidica is an emerging diagnostic company that has developed a revolutionary technology platform to detect circulating biomarkers in blood samples to diagnose cancer and prenatal disorders with unprecedented precision and accuracy. This technology was clinically validated and is moving into the commercial development phase.

BioFluidica offers career opportunities for growth, learning and satisfaction in a working environment that supports discovery and encourages collaboration. We are seeking talented, passionate professionals who thrive in a fast-paced, team-oriented, cutting-edge biotechnology environment.
