

Position Title: Scientist Molecular Biology, Full Time

Location: San Diego, California

Position Summary: Development of molecular diagnostics for oncology and prenatal diseases. Tests to development are DNA and RNA based.

Responsibilities Include: Hands-on technology development using advanced molecular analysis. Necessary knowledge and experience in NGS, qPCR, nucleic acid isolation and quantification and analysis.

Required Qualifications: Ph.D. plus 2 years of academic postdoc or industry experience. Knowledge and hands-on experience of molecular biology methods, including DNA methods, RNA methods, and Next Generation Sequencing. Experience in liquid biopsy is a plus. The work includes experimental design, trouble shooting and validation. The candidate must be interested to work in a fast paced, biotech start-up environment with diverse tasks and rapidly growing responsibilities.

Compensation: Dependent upon qualifications and experience, with an excellent benefits package.

To Apply: If you are interested in being part of building the next generation diagnostic technology that will impact the well-being of millions of people, please send your CV and a letter stating your interests to jobs@biofluidica.com. Please put this job reference code in the subject line of the email: SciMolBio 20240304

Notice to Employment Agencies: BioFluidica values our relationships with our recruitment partners. Please be advised that we will only accept resumes from those partners with whom we have a formal Recruitment Contract. BioFluidica is not responsible for any fees related to resumes that are unsolicited and received by any employee of BioFluidica.

About: BioFluidica is an emerging diagnostic company that has developed a revolutionary technology platform to detect circulating biomarkers in blood samples to diagnose cancer and prenatal disorders with unprecedented precision and accuracy. This technology was clinically validated and is moving into the commercial development phase.

BioFluidica offers career opportunities for growth, learning and satisfaction in a working environment that supports discovery and encourages collaboration. We are seeking talented, passionate professionals who thrive in a fast-paced, team-oriented, cutting-edge biotechnology environment.
